Sydney's Premier Orthodontic Practice

1 our philosophy

At Orthodontics Exclusively our goal is the creation of a beautiful smile and the best possible function for each patient.

We are committed to providing the best orthodontic care in keeping with the most current scientific knowledge available.

We recognise the importance of both the result and the service.

It is important to us that you feel cared for as an individual and that a sense of trust and friendship emerges from your experience.

2 why choose us?

Our practice has the edge in providing orthodontic excellence for the following reasons:

- We are the longest established orthodontic partnership in Australia and all partners are leaders in **non-extraction** orthodontic treatment.
- We are the largest orthodontic practice in Sydney which has enabled each partner to pursue **sub-specialisations** within the discipline of orthodontics, thus ensuring the highest order of patient care.
- Each patient is **ONLY** ever treated by a **fully accredited orthodontist**.
- Our practice reflects the most current innovations in the specialty of orthodontics and we proudly offer the option of **aesthetic orthodontics** (including the finest clear porcelain brackets as well as invisible techniques such as **INVISALIGN®**, lingual braces and cutting edge mini implant technology).
- Our association with the Westmead Craniofacial Clinic and Royal North Shore Hospital, as well as our close association with general dentists and other specialists, enables the most challenging cases to be successfully treated using an interdisciplinary approach.
- All partners have university appointments.

ESTABLISHED SINCE 1953

3 your orthodontists

Dr. Stephen Duncan

I have enjoyed every moment of my 15 years at Orthodontics Exclusively. The wealth of experience and expertise within our practice has allowed me the opportunity to develop techniques that treat the entire spectrum of orthodontic problems to the highest standard. In addition to my conventional treatment techniques (and due to the ever increasing number of adults seeking orthodontic correction), I committed myself to the treatment of my adult patients using braces placed on the inside of the teeth so they cannot be seen. To be able to create a beautiful smile for someone without anyone knowing braces have been worn is the ultimate in orthodontic care.

Dr. Daniel Ngan

Dr Ngan completed his Orthodontic training at The University of Sydney and was awarded the MRS medal for The Most Outstanding Postgraduate Orthodontist in Australia, the Foundation Award for his research thesis, and the Australian Orthodontic Board award for his clinical work. He is also the recipient of the University Gold Medal from the University of Otago for Excellence in Dentistry, and lectures as a Specialist Clinical Associate at The University of Sydney.

"I started orthodontics in 2001, and thoroughly enjoy creating smiles that give people confidence. I strive for excellence and use all techniques including invisible lingual braces, Invisalign, functional appliances, and mini implants."

Dr. Ted Peel

It gives me incredible pleasure to be treating the children (and in some cases the grandchildren) of patients I have treated since joining the practice in 1976. As the result of my appointment at the University of Sydney, I am using the evolving ideas and concepts in orthodontics to constantly improve the treatment for those patients I have had the privilege to care for. The orthodontic students who I teach, as well as the practice partners, continue to challenge me and help me to stay as enthusiastic about my work as when I first joined the partnership.

Dr. Paul Taylor

I joined the practice in 1981 and have experienced enormous professional satisfaction in being part of a great practice that always strives to better itself. I live in the suburb where I do most of my work and it gives me special enjoyment when I see people treated by our practice with such self confident and beautiful smiles. My special interest has been using a combination of surgery and orthodontics for patients who have more severe problems. We have been developing a new way of using magnets to treat patients with undershot bites. The results of this new, patented technology have been highly encouraging and the patient feedback about the comfort of this treatment has been very positive.

Adj. Assoc. Professor James Hawkins AM

It has been stimulating to work in this partnership, where I enjoy the challenge of maintaining my clinical skills to current, best practice standards. Certification by The Australian Orthodontic Board has also helped in achieving this goal. In 1967, I established the Orange branch, seeing it as a way to offer the best in orthodontics to a rural centre. I am now seeing many children of former patients, and it is a great experience to meet them again as proud parents. Teaching has also been an important part of my professional life, and in 1996 I was appointed an Adjunct Associate Professor at the University of Sydney.

Dr. Jason Yee

Dr Yee completed his dental degree at The University of Sydney with first class honours receiving prizes in restorative dentistry, fixed prosthodontics and endodontics. He was a University Honorary Clinical Associate, and maintained a private practice prior to completing specialist training in Orthodontics at The University of Sydney with honours. He also completed the Royal College examinations for both Edinburgh and Australia in the same year. He enjoys orthodontics immensely and gains great satisfaction in creating beautiful smiles.

SIMONE

our patients 4

IN JUST A SHORT PERIOD OF SIX MONTHS, MY ORTHODONTIST FROM ORTHODONTICS EXCLUSIVELY WAS ABLE TO WORK HIS MAGIC AND GIVE ME THE brilliant smile so many people compliment me on today.

JACQUELINE

"BEFORE I HAD MY TREATMENT I HID MY SMILE BECAUSE I DIDN'T WANT TO SHOW MY TEETH. NOW I TRY TO SHOW THEM AS MUCH AS POSSIBLE AND I AM PROUD OF MY SMILE."

TIM

I'm very happy with the result. -Orthodontics Exclusively has worked miracles in my mouth. MY ORTHODONTIST WAS ALWAYS KIND AND PATIENT and I can't thank him enough.

MELINDA

"I have worked for the Orthodontics Exclusively practice for 3 years. In that time I have seen hundreds of patients have their smiles and self confidence restored. It has been *so inspiring* seeing the transitions our patients make, as well as the time and care our doctors put into their work, that I even had treatment myself.

TANYA

"My experiences with the practitioners at Orthodontics Exclusively have been VERY POSITIVE. Each stage of the treatment was explained clearly so that I was always fully aware of where we were at in the treatment program. Waiting times were always kept to an absolute minimum, and that was very important to a me as a working mum.

I AM THRILLED WITH MY NEW SMILE."

JOSH

"Before I went to the orthodontist I was worried. When I got there, I found out it wasn't bad at all. I quickly got used to having braces. Now they're off and my teeth are straight. I'm really glad I had them.

AS AN 18 YEAR-OLD YOUNG MAN, CONFIDENCE IS FUNDAMENTAL. THE ORTHODONTIC WORK IS OF THE HIGHEST QUALITY. IT WAS EFFICIENT AND THE RESULTS SPEAK FOR THEMSELVES. ORTHODONTICS EXCLUSIVELY HAS MADE A REAL IMPACT ON MY LIFE.
